Education

University of Illinois Chicago (UIC), Chicago, IL May 2026
Master of Science in Computer Science (Joint BS/MS Accelerated Program) GPA 3.2

University of Illinois Chicago (UIC), Chicago, IL December 2024
Bachelor of Science in Computer Science, Concentration in Software Engineering GPA 3.6

Skills

Programming Languages: Java, TypeScript, JavaScript, Python, C#, C++, SQL, HTML, CSS, TailwindCSS

Frameworks & Technologies: React, Figma, Node.js, Express.js, git, Jest, Agile, REST APIs, HCI, System Design

Internship Experience

Productive Edge, Chicago, IL

Summer Software Engineering Intern

May 2022 – August 2022

- Collaborated with 5 interns using scrum agile to plan, develop, and present “MLB game predictor” a DevOps project integrating **Databricks, Azure, React, Python, and Typescript**
- Created the CI/CD pipeline for website development and created a **Python** notebook for mounting and uploading data to Microsoft Azure static web container with full **Jest** test coverage.

Projects

Tongue Trackpad, UIC Master’s thesis

March 2026

- Converted large scale HTML web interface to **React** for specialized biomedical tongue sensor using to support tongue rehabilitation research and conducted user studies to evaluate improved user engagement and motivation.

Makemeet, UIC Secure web development

December 2025

- Engineered system design in team of 4 for google calendar integrated collaborative scheduling website
- Developed a serverless web application using **Astro** with **React** and **Cloudflare** with **D1 (SQLite)** and object store

sparkhacks.org

January 2025

- Collaborated in team of 5 to design and develop the hackathon’s homepage using **Astro** with **React**
- Facilitated a supportive environment for newcomers by presenting annual workshop on **React.js** to 40+ attendees.

Dreadnought, UIC Software Engineering

December 2024

- Practiced agile in team of 3 to develop a **Node.js** game server using WebSocket and **React** frontend for running simultaneous battleship games with 6+ players and expandable catalog of ships

Idle Fire, Personal Project

August 2022

- Designed and implemented mobile responsive web application in React with Redux design pattern
- Followed Redux design pattern, React hooks, and factory design pattern to create game with 7+ upgrades

Work Experience

University of Illinois Chicago, Chicago, IL

Student Research

June 2024 – May 2026

- Supported Human Computer Interaction research by developing web applications with vanilla **HTML** and **React**
- Explored new user interactions through AI API integrations, canvas elements, and hardware integration

University of Illinois Chicago, Chicago, IL

Teaching Assistant

January 2025 – December 2025

- Held weekly office hours to support students in understanding programming concepts to aid students in homework and projects across **Python, SQLite, F#, and Golang**
- Graded assignments, exams, and projects, providing constructive feedback that improved students' code organization

Codepath, Remote

Tech Fellow

May 2024 – November 2025

- Provided live support to 25+ students to ensure they develop full stack web development and problem-solving skills
- Collaborated with CodePath.org operations team to identify improvements for the student learning experience

Relevant Leadership

Association for Computing Machinery (ACM), UIC Chapter – President, SIG Leader December 2022 – January 2026
